Who is Thetford?

We all want to relax and be free of worry on our holidays, which is why Thetford offers only the best products.

You may know Thetford as the inventor of the world-famous portable toilet, the Porta Potti. Or as the inventor of the Cassette Toilet. But these are just two of the many innovative solutions from Thetford...

INNOVATIVE MARKET LEADER

The fact is that Thetford is not only the world's leading manufacturer of mobile sanitary systems, toilet care products, and accessories such as service doors for caravans and motor homes, Thetford is also one of the leading manufacturers of mobile refrigeration systems and kitchen appliances.

For more than 35 years, Thetford has been designing and developing mobile solutions for the leisure market. Our aim is to provide the best in mobile systems and related products - the best value, the best quality and the best service.

With the acquisitions of the leading Italian manufacturer of high-end toilets for luxury yachts (Tecma) and the leading British manufacturer of high-quality cooking appliances (Spinflo), Thetford is able to provide its worldwide customer base with a complete range of innovative products for caravans, motor homes, holiday homes and yachts. We can say with pride that innovation, long-term experience and knowledge are essential components of our strength and success.

SERVICE & SUPPORT

At Thetford, you can rely on the best advice and support. Our extensive service network consists of a large number of service centres that provide guidance and support at many locations. We also have a comprehensive online presence offering product information, service tools, points of sale and service center information in many languages on our website: www.thetford.eu. Of course, you are also welcome to contact us directly - our customer service team is here to help you!

QUALITY, SAFETY & THE ENVIRONMENT

Thetford products satisfy even the most stringent legal requirements in all European countries. Many of our quality products have been certified in various countries for their high level of environmental consciousness. These certifications include the Milieukeur (Dutch environmental quality label) and the Blaue Engel (German environmental quality label).

Thetford has a pro-active Environment, Health and Safety policy. Our quality management system is certified in accordance with ISO 9001:2000 and ISO 14001:2004. Also, our occupational health and safety management system is certified with OHSAS 18001:1999. These certifications form the basis of the quality standard we apply to all our products.

For that real carefree holiday feeling, you can always rely on Thetford!

Portable Toilets

If you are looking for a comfortable, practical and durable portable toilet that doesn't have to be connected to a drainage or water system, Thetford has the perfect solution for you: the Porta Potti. Discover this world renowned Thetford invention for yourself!

YOUR OWN TOILET: ANYWHERE AND ANYTIME

Because the toilet is compact, lightweight and easy to use, the Porta Potti is often used in caravans, motor homes, boats, folding trailers and even summer houses. But these portable toilets also come in handy during house renovations or just as a second toilet. The Porta Potti is simple to transport and really can be placed anywhere.

QUALITY FIRST

We pay a lot of attention to quality, thereby ensuring that your Thetford Porta Potti will give you many years of trouble-free service. Porta Pottis are made of durable high-grade plastic, which, combined with their rounded shape, means they are easy to clean and maintain. And these portable toilets have many innovative features that optimise comfort and ease of use, such as an integrated emptying spout, a luxury electric flushing system and a level indicator for the waste-holding tank.

ADVANTAGES OF THE PORTA POTTI

- Made by the inventor
- Lightweight, high-quality plastic
- Durable and practical in use
- Integrated emptying spout
- Handy vent button for splash-free emptying
- Choice of flushing system
- Level indicator, to show when it needs emptying*
- A three-year warranty
- Extensive range of Thetford Toilet Care products and spare parts
- Good quality achieved through years of experience in portable sanitation

* Except for the Porta Potti 145 and Porta Potti 165

Porta Potti[®]

HOW THE PORTA POTTI WORKS

The Porta Potti consists of two sections. The upper section is a combined flush-water tank and toilet bowl with detachable seat and cover. The lower section is the waste-holding tank.

- 1 The two parts are easy to attach and detach using a handle at the rear of the toilet.
- 2 Adding the correct dosage of Thetford Toilet Care products to the waste-holding tank using the emptying spout is simple (*Read more about Thetford Toilet Care products on pages 13-15*).
- 3 Water and flush-water fluid (*Aqua Rinse*, see page 15) can be poured directly into the top of the flush-water tank.
- 4 The lightweight waste-holding tank is easy to transport and features a handy container to store the two free samples of our toilet care products.
- 5 All models feature a unique integrated rotating emptying spout, making emptying as simple as can be. There is no need to dismantle or clean separate parts. The waste-holding tank also has a vent button, which you press while emptying to prevent unpleasant splashing.
- 6 The Porta Pottis are equipped with a level indicator*, so you are warned in good time when the waste-holding tank needs emptying.

* Except for the Porta Potti 145 and Porta Potti 165

FLUSHING THE TOILET IS SIMPLE

Manual, bellows pump

Manual, piston pump

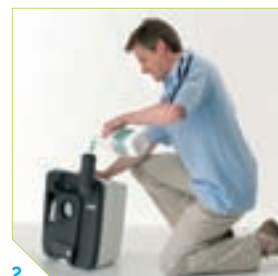

Electric pump

Depending on the model, the Porta Potti comes with a manually operated bellows pump [A]; a manually operated piston pump (light, easy to use and ensures a strong flush) [B]; or a luxury electric flushing system (six 1.5V AA batteries, enough for 500 to 700 flushes) [C].

So there's something for everyone.

Various accessories are available from our dealers to give even more comfort and functionality to your Thetford products.

- Piston pump: manually operated pump, which is light and easy to use, and ensures a strong flush.

Built-in Toilets

The Cassette Toilet

The Cassette Toilet, another great Thetford invention, has a removable waste-holding tank and is the ultimate sanitary solution for your caravan or motor home. The Thetford Cassette Toilet surpasses any comparable toilet for ease of use, and its unique design ensures it fits in every modern caravan and motor home interior.

THE PERFECT MOBILE TOILET SOLUTION

The Cassette Toilet is a built-in toilet consisting of two parts: a permanently installed toilet and a removable waste-holding tank. You can easily access and take out the waste-holding tank via a small door on the outside of the vehicle, making it much easier to prepare the toilet for use and to maintain the tank.

The Cassette Toilet is manufactured from high-quality, lightweight materials, has a powerful, yet quiet flushing system, and advanced fixtures and fittings. What's more, the toilet will form an integral part of the bathroom of any caravan or motor home. Combined with Thetford Toilet Care products, the Thetford Cassette Toilet is the ultimate sanitary solution for your caravan or motor home!

ADVANTAGES OF THE CASSETTE TOILET

- Optimal use of space
- Lightweight, high-quality plastic
- Durable, user-friendly and maintenance-friendly
- Easy access to the waste-holding tank from the outside
- Powerful flushing system: choice of manual or electric (12V)
- Quiet to use: no noise nuisance compared to other suppliers
- Level indicator: shows when the waste-holding tank needs to be emptied
- Built-in rotating emptying spout
- Vent button for emptying without splashing
- Automatic pressure release vent: prevents build-up of gases and ensures splash-free opening of the waste-holding tank
- Independent water supply or connected to your vehicle's central water tank

1

HOW THE CASSETTE TOILET WORKS

To prepare the toilet for use:

1 Open the access door on the outside of your caravan or motor home and remove the waste-holding tank.

2

2 Simply dose the waste-holding tank with a Thetford Toilet Care product (e.g. Aqua Kem Blue / Aqua Kem Green, see page 14) using the built-in rotating emptying spout. No separate parts need to be dismantled and cleaned.

3 For models that have their own flush-water tank, you also need to fill this tank. Depending on the model, open the water-filling door or the access door to add flush-water fluid (Aqua Rinse, see page 15) and fill up with water.

3A

The toilet is now ready for use.

4 A level indicator is activated as soon as the waste-holding tank is about two-thirds full, and it shows you when the tank needs to be emptied.

5 Then all you have to do is remove the waste-holding tank and empty it - splash-free thanks to the unique vent button - in the nearest authorised waste dump.

3B

After this, you should prepare the toilet ready for use again.

Tip! Did you know that Thetford offers toilet care products that can be emptied into a septic tank? Read more on page 13-15.

NEW! The Cassette Toilet C-250

The latest member of the Cassette Toilet family is the C-250. With its 180 degree revolving toilet bowl, the C-250 has several exciting new, improved features and a contemporary design.

IMPROVED FEATURES INCLUDE

- Enhanced seating comfort: the toilet bowl width and depth have been adjusted to provide maximum comfort.
- A waste-holding tank (17.5L) on wheels with a pull-out handle.
- A user-friendly control panel.

BUT THERE'S MORE... THE C-250 CAN BE UPGRADED WITH VARIOUS OPTIONS

- An electric blade opener*.
- Multi-level indicator waste-holding tank*.
- Level indicator flush-water tank*.
- An automatic ventilator* that draws off any unpleasant smells from the waste-holding tank through a filter - odourless - to the outside of the vehicle (filter lasts an average season's use).
- A unique Waste Pump-Out System, making it possible to (automatically) transfer the waste from the waste-holding tank of your Cassette Toilet to the vehicle's large waste tank.

* You can upgrade your C-250 model at any time with these options, to enhance the comfort and functionality of your Cassette Toilet even further!

ACCESSORIES

Various accessories are available through our dealers to give even more comfort and functionality to your Thetford products.

For all Cassette Toilet models

- Outside vent: ventilates odours from the waste-holding tank to the outside of the vehicle (standard on C-403 L).
- Extra waste-holding tank.

For Cassette Toilet C-250

- Electric blade opener.
- Multi-level indicator waste-holding tank: shows when waste-holding tank is almost empty, half full or needs to be emptied shortly.
- Automatic ventilator: automatically filters smells from the waste-holding tank - odourless - to the outside of the vehicle.
- Filter for the automatic ventilator (filter lasts an average season's use).

Toilet Care Products

For more than 35 years, Thetford has been designing and developing toilet care products to keep our mobile toilets functioning superbly. The researchers working in our renowned laboratories and external institutes are constantly developing and testing new products. All because we want to give you the best that money can buy!

SPECIAL CARE REQUIRED

The experiences of users and our own extensive tests have shown that mobile sanitation systems require special care and maintenance. To avoid possible damage, faster wear-out or problems when emptying the waste-holding tank, we advise using Thetford Toilet Care products. Our products are there to guarantee trouble-free and comfortable use of your portable or built-in toilet. You can rely on our 35 years of experience in developing toilet care products!

DAILY AND PERIODICAL CARE

There are Thetford Care products for daily and periodical care of your mobile toilet. Thetford also develops and manufactures other care products to clean, maintain and protect the interior of your caravan or motor home so you can enjoy a relaxed and carefree holiday.

SAFE & ENVIRONMENTALLY CONSCIOUS

Products from Thetford satisfy even the most stringent legal requirements in all European Countries. Many of our products are tested, amongst other things, for their biodegradability, functionality and suitability for sewerage treatment systems. End users, camping organisations and government bodies all acknowledge the high standard and quality of Thetford products. Moreover, many of our products have been certified in various countries for their high level of environmental consciousness. These certifications include the Milieukeur and the Blaue Engel (Dutch and German environmental quality labels).

WHY USE THETFORD TOILET CARE PRODUCTS?

- Complete range of high-quality products for daily use and periodical maintenance
- Products come in a variety of pleasant smells and colours to disguise toilet waste
- Concentrated formula means they are economical to use and easy to pour
- Measuring strip makes for easy application of the correct dose
- Safe for plastic and rubber toilet parts
- Global availability
- Stable reliable quality
- Complies with all EU and national legislation
- Granted several environmental certifications: only brand in Europe with Milieukeur and Blaue Engel (Dutch and German environmental quality labels)
- 35 years of experience in designing and developing mobile toilets and toilet care products
- Continuous research and development: we are always looking at ways to improve our products

Toilet Care products for the waste-holding tank

All the waste-holding tank products for daily use:

- Suppress unpleasant smells.
- Promote the breakdown of solids and toilet paper.
- Reduce the formation of gas.
- Keep your waste-holding tank pure and clean.
- Protect moving parts and extend the lifespan of the toilet.

As well as these qualities, each waste-holding tank product has its own specific benefits.

AQUA KEM BLUE

A powerful toilet fluid for daily use. This popular toilet fluid has a lovely, fresh scent and lasts four to five days with average use. Even if Aqua Kem Blue freezes, it will still be effective after it defrosts.

Packaging: 1 of 2L bottle, 1L dosage bottle / **Dosage:** 60ml per 10L waste tank capacity.

AQUA KEM GREEN

A toilet fluid with biological action for daily use. Aqua Kem Green biologically stimulates the breakdown of toilet waste in the waste-holding tank. Aqua Kem Green acts for a maximum of three to four days with average use. It remains fluid up to -20°C and even if it does freeze, is still effective after defrosting. This product is particularly suitable when emptying the waste-holding tank into septic tanks* on camp sites.

Packaging: 1.5L bottle, 375ml flask / **Dosage:** 75ml per 10L waste tank capacity.

AQUA KEM NATURAL

Effective toilet pearls for daily use. Aqua Kem Natural has a pleasant neutral scent and biological action. The toilet pearls, pre-packaged in handy, lightweight pouches (one pouch = one dose) biologically stimulate the breakdown of waste in the toilet's waste-holding tank. Aqua Kem Natural can be emptied into a septic tank*. With average use, Aqua Kem Natural acts for a maximum of three to four days.

Packaging: Box with 10 pouches / **Dosage:** 1 pouch.

AQUA KEM SACHETS

Sachets filled with powder for daily use. Aqua Kem sachets are toilet sachets that are completely dissolvable in water. This means you can apply the right dose easily and economically. All you have to do is place the sachets directly in your waste-holding tank, and they dissolve quickly. For average use, one dose is effective for a maximum of four to five days. **Packaging:** Resealable canister with 15 sachets / **Dosage:** 1 sachet.

CASSETTE TANK CLEANER

A powerful fluid for periodical cleaning and maintenance. Cassette Tank Cleaner easily removes stubborn calcium deposits that can form on the moving parts and walls of the tank, no scrubbing required! Cassette Tank Cleaner thoroughly cleans the waste-holding tank and prolongs its life span. **Packaging:** 1L bottle / **Dosage:** 300ml.

Before

After

* Test ISO 11734

Toilet Care products for the flush-water tank

AQUA RINSE

A lavender scented toilet fluid for daily use. Aqua Rinse keeps the flush water fresh and ensures that your toilet flushes effectively. After you use Aqua Rinse, it leaves a protective layer in the toilet bowl that prevents deposits forming. Moreover, its lubricating action makes the blade of your waste-holding tank easier to open and close.

Packaging: 1.5L bottle, 400ml flask / **Dosage:** 100ml per 15L flush-water tank capacity.

More Thetford Care products

AQUA SOFT TOILET PAPER

A specially developed super-soft toilet paper that quickly dissolves in your waste-holding tank. This prevents clogging and makes the waste-holding tank easier to empty. Ordinary toilet paper doesn't break down so easily and can cause blockages. When you use Aqua Soft, you prevent malfunctions or damage to your waste-holding tank while also protecting its moving parts.

SEAL LUBRICANT

A lubricant for the periodical care, protection and lubrication of seals, locks, hinges, awning rails, bicycles, etc. Thetford Seal Lubricant has been specially developed for our toilets and is absolutely safe to use. Regular use on the blade seal of the toilet, for example, ensures that it always stays pliable and will last longer.

BATHROOM CLEANER

A powerful cleaning agent for daily maintenance. Thetford's Bathroom Cleaner can be used to safely, thoroughly and easily clean all plastic surfaces in caravans and motor homes, including your Thetford toilet and the other parts and components in the bathroom. The active foam removes calcium deposits, gives a lovely shine and guarantees perfect hygiene.

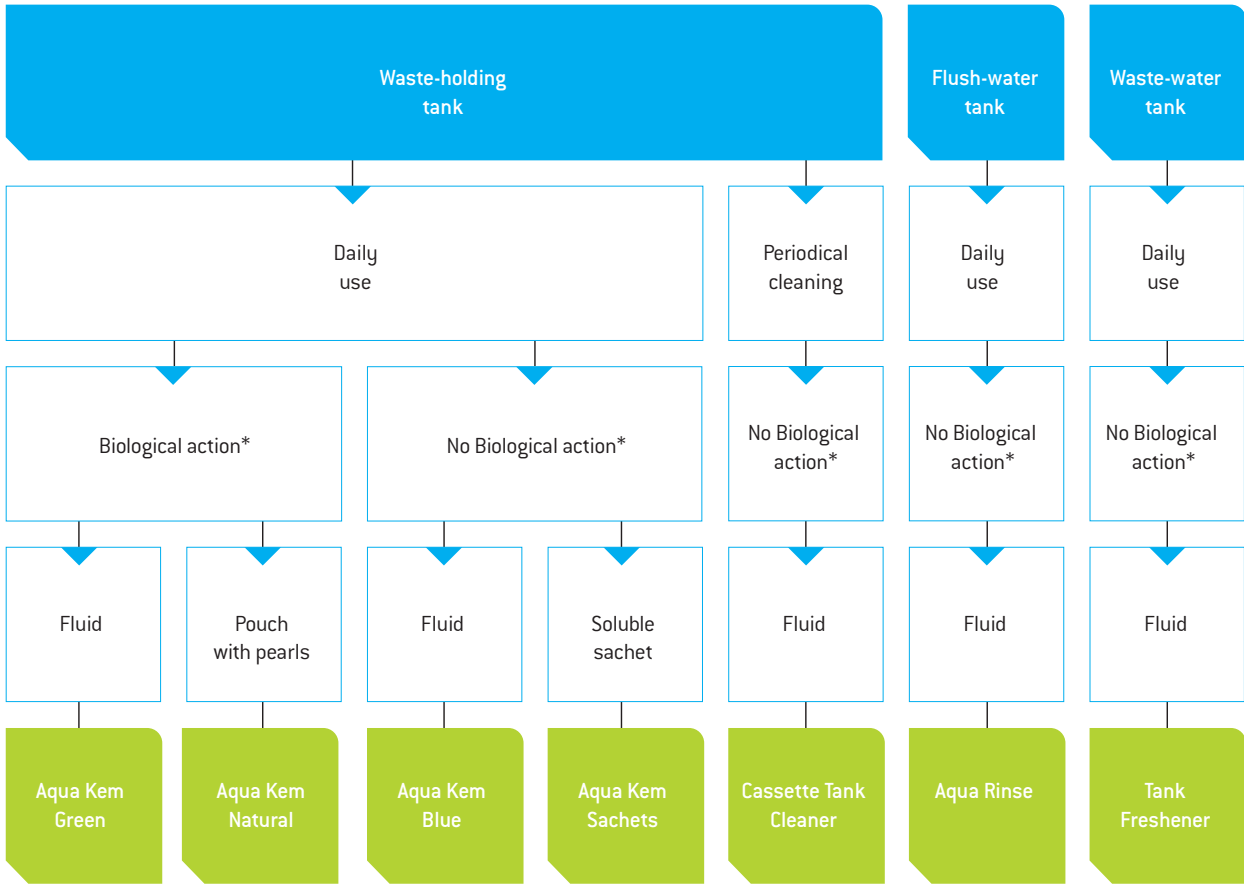

TANK FRESHENER

An effective fluid for daily use and maintenance. Tank Freshener reduces and prevents deposits and the accumulation of grease in the waste-water tank and pipes, making the waste-water tank fresh and clean. No more unpleasant smells from the waste-water tank, shower, washbasin or sink of your caravan or motor home.

Packaging: 1.5L bottle / **Dosage:** 50ml per 25L waste-water tank capacity.

When to use which Toilet Care Product?

* Micro-organisms biologically break down the toilet waste in the tank. Particularly suitable when emptying the waste tank into septic tanks on camp sites [Test ISO 11734].

The range of available Toilet Care products may vary for each country.

Refrigerators

You love to get away from it all now and then - away from the hustle and bustle, in search of rest and relaxation. With a Thetford refrigerator, you will always be comfortable on your journey. It will keep your provisions fresh, tasty and reliably cool. So you can make the most of your well-deserved rest.

QUIET AS A WHISPER

Thetford absorption fridges work in a different way from the one at home. Because Thetford fridges have no compressor, they are far quieter. So your peaceful enjoyment of your caravan or motor home won't be disturbed.

QUALITY... GUARANTEED!

Thetford absorption fridges are extensively tested to our high-quality standards. You can be assured that our fridges will give a first-class performance in any situation. Thetford fridges come with a three-year guarantee instead of the usual two years. They have the CE mark of quality, and are CFC-free and almost entirely recyclable. Thetford absorption fridges: the cooler choice!

HOW THE ABSORPTION REFRIGERATOR WORKS

All Thetford absorption fridges work from the mains (230V), direct current (12V) or gas, allowing you to use your fridge in any situation. Ignition and control mechanisms do, however, differ depending on the fridge model.

- Manual Energy Control (MEC): MEC-fridges with piezo-electric ignition can even work using only gas - without being electrically connected. If you select gas, you press the Ignition button until the flame appears.
- Electric Energy Selection (EES): the desired energy source is also selected manually for fridges with electric ignition. The flame will then be ignited electrically.
- Smart Energy Selection (SES): automatic fridges with a Smart Energy Selection system. The SES system automatically chooses the best available energy source. If it selects gas, the gas will be ignited electrically.

ADVANTAGES OF THE ABSORPTION REFRIGERATOR

- High-quality cooling unit giving a first-class cooling performance.
- Securely closed door. The door's closing mechanism ensures that the fridge will remain closed while you're driving.
- Efficient door bins. The door containers are adjustable in height and prevent leakage along the inner side of the door.
- Flexible bottle slide. The bottle slides ensure that any size or shape of bottle can be held securely in place. Also, some fridge doors have a bottle rack to keep larger bottles in place.
- Handy non-slip click strip. The plastic strip on the storage racks in the fridge ensures that food cannot shift while in transit.
- Flame indicator. Immediately after ignition, the flame indicator on the control panel shows whether the flame is lit; stooping to look for the flame is a thing of the past!
- Defrost cycle and self-diagnosis. All Premium LCD fridges are equipped with an automatic defrost cycle, which prevents ice collecting on the freezer element and makes manual defrosting unnecessary. These fridges have a reliable self-diagnosis system so that, should a failure occur, the error code for the specific problem is displayed on the control panel.
- Rounded or flat door. Thetford fridges have a modern flat or rounded door. The rounded door gives the fridge a sleek appearance that integrates perfectly with the interior of your caravan or motor home. Models with a rounded door have a larger capacity.

DELUXE LINE & PREMIUM LCD LINE

Thetford offers two lines of absorption fridges: the Deluxe line and the Premium LCD line.

The Thetford Deluxe line is a complete range of fridges with many advantages, such as efficient door containers, flexible bottle slides and a handy flame indicator. You can choose from piezo (MEC) or electric ignition (EES).

The Premium LCD line is equipped with many modern conveniences. It has a unique LCD display indicating the cooling level you have entered and the selected energy source. A self-diagnosis system so that, should a problem occur, an error code is displayed on the control panel, which you can look up in the manual to discover what the problem is and how to correct it. They are all available with electric (EES) or automatic operation (SES). What more could you want?

NEW! The Frameless Door

The Frameless Door is an innovative door panel suitable for Thetford Deluxe line and Premium LCD line absorption refrigerator cabinets with a rounded design*. What makes this door so unique to Thetford is that it has virtually no frame. Whereas until now, most refrigerators have had bulky plastic frames, the visible plastic parts on the Thetford Frameless Door have been reduced to a minimum, giving the refrigerator a stylish, modern look that would fit well in any designer kitchen!

The Frameless Door is now exclusively available to manufacturers of caravan and motor homes to exploit its virtually unlimited customisation possibilities.

ACCESSORIES

Various accessories are available through our Thetford dealers to give even more comfort and functionality to your Thetford products.

- Vents. A Thetford vent gives a nice finish to the ventilation opening on the outside of your vehicle (the ventilation opening is needed for correct fridge operation).
- Vent covers. A nicely designed cover that can be placed over the ventilation grill during winter storage, while cleaning or when the temperature is below 8°C.
- Door bins / shelves. Easy to replace and create extra storage space in your fridge.

Cooking Appliances

Spinflo hobs, ovens, grills, sinks and gas fires are world-renowned for their high-quality and home-like design. Whether you have a holiday home, caravan or motor home, we have the appliances to suit your situation and budget!

QUALITY APPLIANCES...

All Spinflo products have reliable domestic-size knobs, are easy to install, and are available in many different materials and finishes. All Spinflo cooking appliances can be equipped with either piezo-electric, 12V or 240V spark ignition systems and feature domestic-style burners and taps with flame-failure devices. Made with uncompromising quality, these are just a few of the many advantages of Spinflo cooking appliances.

Of course, every Spinflo product is thoroughly tested to ensure ultimate safety and customer satisfaction. It goes without saying that all products are approved to the latest European standards (EN30).

ADVANTAGES

- High-quality materials and components
- Contemporary, home-like design
- Domestic-size knobs
- Easy to clean
- Optimal use of space
- Good finishing
- Manufacturers' customisation possibilities are virtually unlimited

MORE OPTIONS AVAILABLE

The options shown in the table of specifications are available for retrofitting by consumers through Thetford dealerships. However, there are many more options available for caravan and motor home manufacturers to build in. For example, electric burners, types of ignition, oven lights, glass and handles.

Doors & Boxes

Thetford is an expert when it comes to doors. We have been a market leader in producing service doors for many years and also offer an Entrance Door for caravans that you won't find anywhere else. In combination with our practical storage boxes, you'll get optimum use of space with a modern look!

Service & Flush Doors

SERVICE DOORS: CREATING EXTRA ACCESS

With Thetford Service Doors, you can create extra and easy access to certain areas in your caravan or motor home. Thetford offers a range of elegantly designed, high-quality service doors, and all models are produced using high-grade, lightweight plastics, making them extremely durable.

FLUSH DOORS: PROVIDING EASY ENTRY

Thetford Flush Doors provide easy access to luggage compartments or the waste-holding tank of a built-in Thetford Cassette Toilet. They need to be installed by the caravan or motor home manufacturer because installation requires precision and special tools.

ADVANTAGES OF THE SERVICE DOOR

- Modern, streamlined appearance
- Watertight and UV resistant
- Double seal ensures optimum insulation
- Special push-button locks allow the doors to be closed securely, so they can't spring open unexpectedly or be forced open
- Easy self-installation: Thetford service doors are easy to install yourself, horizontally or vertically
- An easy step-by-step guide is supplied along with a template for creating the opening in the vehicle wall
- Thetford service doors are suitable for all walls with a thickness of between 23 and 39 mm

Battery Box & Wet Locker Box

BATTERY BOX

The Thetford Battery Box* is designed to accommodate an auxiliary battery in a caravan or motor home. The Battery Box has a CE socket to connect the vehicle to a 230V power source, but can be fitted with several sockets and outlets.

WET LOCKER BOX

The Thetford Wet Locker Box* is a storage compartment for caravans and motor homes. Wet swimming or surfing gear, diving equipment, etc. can now be stored hassle-free and without worrying about possible water damage to the caravan or motor home.

* These products are for sale only to caravan and motor home manufacturers.

NEW! Entrance Door

MODERN & SAFE

Caravan owners often find that the currently available standard entrance doors and locks do not provide adequate protection against illegal entry. The innovative Thetford Entrance Door, unlike its competitors, has been specially designed to increase the security of the vehicle and its occupants against illegal entry.

There is no comparable entrance door in the market, which is a comforting thought when you're on holiday! The Thetford Entrance Door is now exclusively available to manufacturers of caravans.

Multi-point lock system

ADVANTAGES OF THE THETFORD ENTRANCE DOOR

- Contemporary look
- Unique multi-point lock system, fully integrated into the door
- Large, strong and ergonomic handle to fit all hand sizes
- Fixed double (acrylic) glass window, integrated into the door surface
- Hard and impact resistance thanks to high-tech fibre used on the doors
- Cold-bridge proof thanks to plastic outside frame
- Pleated blind and user-friendly door bin
